

EventLog

```
graph BT; EventManager[EventManager] -.->|events| EventLog[EventLog];
```

The diagram illustrates a relationship between two classes: EventLog and EventManager. EventLog is represented by a white rectangular box at the top, while EventManager is a gray rectangular box at the bottom. A dashed purple arrow points from EventManager up to EventLog, with the label 'events' positioned to the right of the arrow's shaft.
