

INA3221::getCurrentCompensated

INA3221::getCurrentCompensated\_mA

INA3221::getVoltage

```
graph LR; A[INA3221::getCurrentCompensated] --> C[INA3221::getVoltage]; B[INA3221::getCurrentCompensated_mA] --> C;
```

The diagram illustrates a relationship between three functions. On the left, two white rectangular boxes with black borders contain the function names 'INA3221::getCurrentCompensated' (top) and 'INA3221::getCurrentCompensated\_mA' (bottom). On the right, a gray rectangular box with a black border contains the function name 'INA3221::getVoltage'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both 'getCurrentCompensated' and 'getCurrentCompensated\_mA' are related to or perhaps delegate to 'getVoltage'.
