

BME280::init

```
graph LR; A[BME280::init] --> B[BME280::get_calibration_parameters]
```

A diagram showing a call from the `BME280::init` function to the `BME280::get_calibration_parameters` function. The `BME280::init` function is represented by a white box with a black border, and the `BME280::get_calibration_parameters` function is represented by a gray box with a black border. A blue arrow points from the `BME280::init` box to the `BME280::get_calibration_parameters` box.
